### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

Response is acknowledged of the amendment filed 01/03/2007. A terminal disclaimer 01/03/2007 also.

The rejection under 35 USC 112, second paragraph, and the judicially created doctrine of obviousness-type double patenting over US Patent No. 6,872,195 are hereby withdrawn.

The following rejection is maintained in this action:

Claims 1-8, 10, 12, 13, 17-24 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-63 of copending Application No. 10/600,257 (US'257). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'257 claims an antimicrobial medical article comprising a mixture of chlorhexidine free base and chlorhexidine salt in a weight/weight ratio of between 1:1 and 1:5 (claims 1, 11). Solvent mixtures are listed at claims 7-9, 12-15.. The chlorhexidine salt is set out as chlorhexidine diacetate in claims 10, 16, 24, 31. The article is identified as a catheter in claim 58. The duration of soaking can also be easily modified. Antimicrobial activity would be a function of the compounds used and the method of preparation. As such, those of ordinary skill would have expected similar antimicrobial properties from the

Art Unit: 1615

instantly claimed catheter and its method of preparation, given the claims of US'257.

There are no unusual and/or unexpected results which would rebut prima facie obviousness. The instantly claimed invention would have been obvious to one of ordinary skill in the art at the time of invention given the claims of US'257.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

Applicant's arguments filed 01/03/2007 have been fully considered but they are not persuasive.

Applicant asked that the provisional obviousness-type double patenting rejection be held in abeyance until an indication of allowability. The only remaining having been corrected, the double patenting rejection is maintained with the understanding that all other prior art issues have been removed, and the application will be in condition for allowance. A supplemental search will be done before the application is allowed.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
